

HIE TECHNOLOGY WORK GROUP - MEETING #2:

Discuss the key technology decisions necessary to build out selected HIE tools/technologies.

Tuesday, November 17, 2015

3:30 pm – 5:00 pm

Dial In: 877-414-4629; Participant: 5500291

AGENDA

I. Introductions (10 minutes)

II. Discuss Backend Architecture and Potential Connectivity Solutions for Existing Data Sources (75 minutes)

A. General Questions to Consider:

- In what format is the data currently captured in (e.g. electronic vs paper, structured vs unstructured, etc.)?
- How is it stored (e.g., federated vs centralized)?
- Who has access (e.g., external vs internal stakeholders)? How is it accessed/transmitted (e.g., query/direct, C-CDA, etc.)?
- How can access be expanded to include other key stakeholders (particularly ambulatory providers)? Can existing data infrastructure be utilized? If not, what must be implemented to help fully leverage this data?

B. Types of Data to Consider:

1) Hospital Utilization Info	8) SNF/Home Health Info
2) Pharmacy Data	9) Immunization Info
3) Demographic Info	10) Referrals
4) Risk Score	11) Quality Reporting
5) PCP/Health Home Designation	12) Prenatal care
6) Lab Radiology Reports	13) Housing Status
7) Ambulatory Utilization	

III. Wrap Up (5 minutes)
